SPECIFICATION:

FEDORA BOUTONIER-CORSAGE VASE PIN HOLDER--CONTAINER

The Fedora Boutonier-CorsageVase Pin Holder-Container is specifically designed and created for the replacement of an ordinary stick pin. This is a decortive keepsake specified as jewelery.

The utility of this invention revolutionizes the way a Boutonier or a Corsage is worn. The utility makes an ordinary stick pin or wrist band obsolete.

The unique cylinder vase and plastic round insert holder which fits snuggly into the vase holds the flowers in place. The spring locking pin either horizontal or vertical allows for stability and security while wearing the flower.

The frontal ornamental shapes allow for different designs for different occasions, and the ability to personalize the jewelery.

The process allows for a basic mold and for any type of metal, such as gold silver, platnium, brass gold plated nickle, and precious gems of all types to be setin the metal along with personal engravings or logos, including but not limeted to school mascotts, weddings proms and the like.

Mass production and custom orders are possible by the utility of this invetion. The four pieces allow for easy production and the ability to change for all consumors request.

This is basicaly a Fedora for your Boutonier or Corsage.

No more dificulty with the flower staying in place, and no more ugly stem to look at, for the decorative vase conseals the stem.

Invetion:

FEDORA BOUTONIERE/CORSAGE VASE PINHOLDER/CONTAINER

BREIF SUMMARY OF THE INVENTION:

The Fedora Boutoniere/Corsage Vase Pin Holder Container:  
Solves the problem of pinning on a boutoniere or a corsage.  
It conseals the stem, in a decrative vase with a front that  
can be customized ordered to fit any occasion. The front can be  
any shape ore any logo, engraved for any occasion. This will  
be a keepsake jewlery item.

The unique vase with clasping pin and plastic insert holder,  
allows easy insertion of the flowers. With stability and security  
for the flower. The stick pin will be no longer needed.

There will be no tearing of material no falling flower.

The utility of this invention will revolutionize and increase  
the sale of boutonieres and corsages. The manufactureing process  
will increase jobs, sales of flowers andsales of the invention  
itself, will add to our economy.

The unique utilaty of this invention will add elagance and class  
to all occasions requiring boutonieres and corsages.

INVENTION: FEDORA BOUTONIERE/CORSAGE VASE PIN HOLDER/CONTAINER

DESCRIPTION OF THE PREFERRED EMBODIMENT

1) A--Process of making and using the invention.

Process: The process of making the invention is simple. Starting with a die cast mold by a jewelry manufacture. The mold or molds use precious metals such as, gold, silver, platinum, gold plated nickel and the like. Several versions of the face of the vase are molded to the vase and the clasping pin are molded to the vase. Custom ordered units with engraved fronts are different logos can be used. Including settings of any or all precious stones. The holder is a plastic insert that fits snuggly into the vase. The pin attaches to the material for secure holding. The face of the vase is custom or repetitive design for consumers request. A plastic unit is not desired for this is a keepsake item. Plastic can not be engraved nor can a clasping pin be attached .

2) Use of the invention:

The use of this invention is the containment and holding of a boutoniere or a corsage. Eliminating the stick pin. Elegance hides the stem of the flower. Allowing a decorative keepsake look of jewelry. With a wide variety of custom designed fronts. This invention can be used for all occasions. The use of this invention simplifies the ability to wear a boutonier or a corsage. Adding to the elegance of the flower, and the way it is worn.
